

CLIPWARE

SALON MANAGEMENT SYSTEM

The ClipWare system is completely turn-key so you are ready to begin operation right out of the box!

System Overview: ClipWare is an automated point-of-sale system designed to meet the needs of most hair salons.

It is a powerful tool to make money for your business by dramatically improving:

Client Services:

Print attractive, detailed in-service tickets and receipts. Quickly process sales, maintain client history including perm cards, color cards, & haircut comments. Track how much time a customer spends waiting & in-service or walk-outs. An hourly readings report averages customer demand to assist in scheduling stylists during peak times. Gift certificates can be issued and redeemed.

Inventory Management:

Take control over your investment in products—stop seeing your inventory “walk away”. Monitor product receiving, in-house usage, inventory valuation, quantities on-hand. Reordering based on sales history and reorder levels.

Stylist Production:

Monitor stylist product sales, service sales, production per hour, actual labor costs. Employee timecard allows stylists to punch in/out which handles hourly wages and computes payroll including overtime and commissions.

Cash Management:

ClipWare balances your drawer to eliminate employee mistakes and/or theft. A multitude of sales reports generated daily, weekly, and monthly provide a breakdown of sales by category, service/product, gender, & stylist. Track Refunds, REDOs, Free items, guest counts, ticket averages, new/repeat business.
